

Our Space: Analysing

I have taken responsibilities to analysis Ravensbourne website and compare it with Nottingham Trent university website.

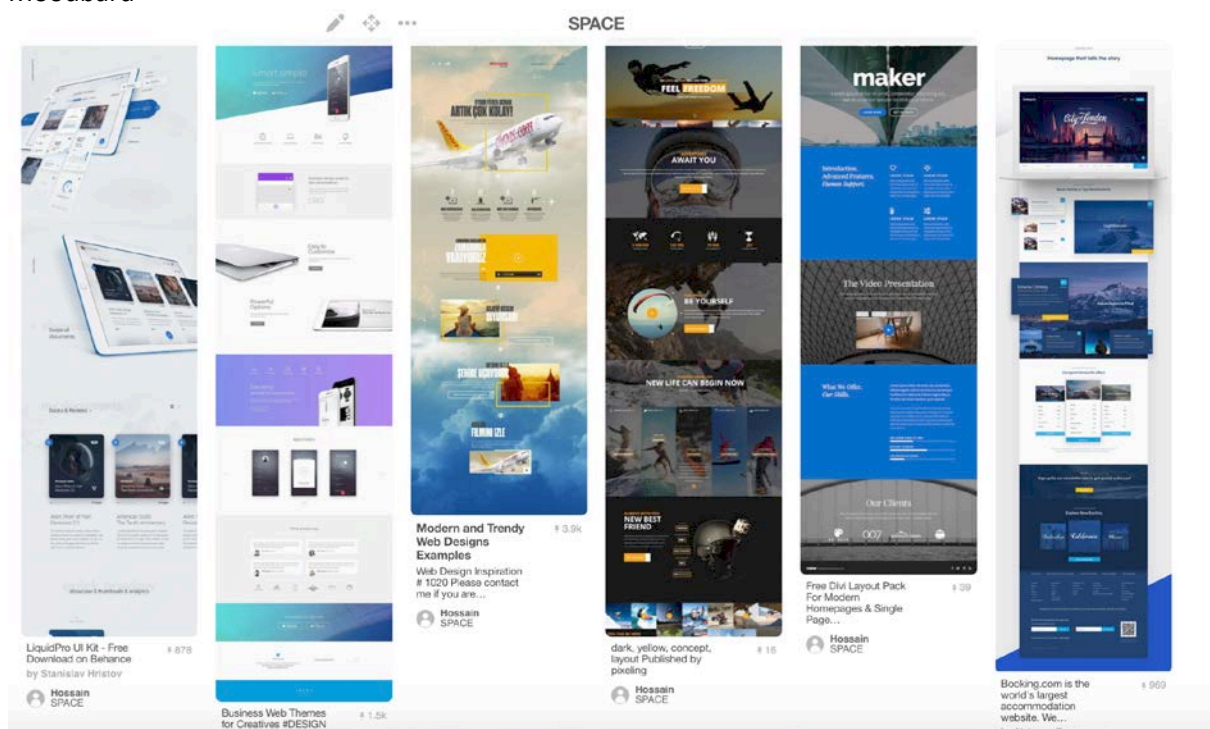

I have found hard find information on Ravensbourne website compare to Nottingham Trent university website. Their UX is very good, anyone who come to website first thing they will look for what courses are available and NTU website display that option at home page. I found NTU website relaxing than Ravensbourne website. I think Ravensbourne need good UX design in the website

Here is an example of wireframe, where Ravensbourne can display courses option at home page.

By displaying courses option at home page, user will find it less time consuming and easy to use.

Moodbard

For inspirations, I have created this Moodboard on Pinterest.

I have done brainstorm with my group.
